

MedITEX Barcode Functionality

1. Matching of materials using Barcode

Starting point: Two samples from two different couple in the laboratory (all samples have been already associated with lab materials – eggs and sperm)

Click on the scanner button in Culture (or use a shortcut Ctrl + M):

This Matcher window will appear:

1. First possibility:

2. Second possibility:

2. Unique identification of patients using barcode

Choose a patient, click on *Demographics*, click on the *drop-down-QM* button with the *drop-down-QM* button reaction of the *drop-down-QM* button with the

This window appears:

Name	Maier, Jane Changed or
Date of birth	11.04.1978 02.12.2013
Patient ID	MJ1
Section	Female demographics
Assign	n 🚊 Generate 👻 🏦 Remove

A: Click on "*Assign*" if you <u>already have</u> a unique barcode and you want to link it with currently selected patient. Scan the barcode. The code appears in the field "Code" and the demographic data will automatically be linked to that barcode after clicking on OK button.

Name	Maier, Jane	Changed or
Date of birth	11.04.1978	02.12.2013
Patient ID	MJ1	
Section	Female demographics	
Code	E004010058328062	

B: Click on "*Generate*" to <u>create a new</u> barcode label for this person. Demographic data will automatically be linked to that code after clicking on OK button.

Now you can print the patient card with the generated barcode. Therefore click on "Print". If you want to see the barcode labels once again, click on the drop-down button *"Print"* and choose "*print with options*":

Ba	arcode Labels	23
	DEMO Jane	
	Date of birth:01.01.1980Patient ID:1 (Female demographics)	
	E00401005832E3CB	
	# Copies 1 A Printer KONICA MINOLTA C353 Set Template Dymo_Template_99010.doc	rie 🗸
	✓ <u>Q</u> K X Car	ncel

Every time you scan this card with the barcode scanner, MedITEX will automatically find and open demographics of the patient associated with that barcode.

3. Document identification using barcodes

Click on patient's *Demographics* and then on the document you want to associate with a barcode label.

Click on the *drop-down QM* button 2010 and choose *RFID/Barcode*. This window appears:

Name	Dr. Jane, DEMO Changed or
Date of birth	21.01.1980 06.12.2013
Patient ID	1
Section	Female finding
Code	< no code >
Assig	Generate 🗸 🏢 Remove

Assign or generate a barcode for that document and stick it or attach it on the print-out document. Next time the patient comes again, just scan the document. MedITEX will immediately find and open the digital version of the document.
